1966-67 CHEVELLE PACKAGE TRAY

***FIBERGLASS PACKAGE TRAY FOR THE 1966-1967 CHEVELLE, BUILT IN PHOENIX***

PHOENIX, AZ, JUNE 9, 2026 -- Fesler USA is now shipping a fiberglass package tray for the 1966-1967 Chevelle, hand-built in Phoenix, Arizona. The panel is designed to drop straight in alongside Fesler door panels and ships ready for upholstery or paint.

WHAT IT IS AND HOW IT'S BUILT

Each tray is laid up, inspected, finished, and packaged in-house at the Fesler shop. No outsourcing, no overseas tooling. The panel can be modified to accept virtually any speaker size, and Fesler's flat Morel speakers are a compatible option that typically requires little to no

cutting.

These panels ship raw, meaning upholstery is the builder's responsibility. Fesler does not sell pre-sewn patterns for this panel. Professional installation is the recommended path if you're not finishing interior work in your own shop.

SPECS AT A GLANCE

- **Fitment.** 1966-1967 Chevelle
- **Material.** Fiberglass
- **Finish.** Unupholstered, ready for paint or upholstery
- **Speaker compatibility.** Morel flat speakers fit with minimal or no cutting
- **Built.** Phoenix, Arizona
- **Lead time.** 1 to 3 business days when in stock

WHY IT EXISTS

Builders putting together a complete 1966-1967 Chevelle interior need panel options that coordinate. This tray was built to work with Fesler door panels so everything lines up, and to give fabricators a solid fiberglass base they can finish the way they want.

“We built this tray so a guy doing a full Chevelle interior has a starting point that actually fits, not something he has to massage for two days before he can even think about upholstery.”

Chris Fesler

The 1966-1967 Chevelle package tray is available now at shopfesler.com.
