1988-98-2000 OBS CREW CAB TRUCK/SUBURBAN DOOR PANELS (SET OF FOUR)

***FULL-COVERAGE FIBERGLASS DOOR PANELS FOR 1988-2000 OBS CREW CAB TRUCKS AND SUBURBANS***

PHOENIX, AZ, JULY 9, 2026 -- Fesler USA is now shipping a set of four hand-laid fiberglass door panels for 1988-2000 Chevy and GMC OBS crew cab trucks and Suburbans. The panels cover the complete factory door area front and rear, ship in smooth gel-coat, and are built in Phoenix, Arizona.

WHAT THEY ARE AND HOW THEY'RE BUILT

Each panel is hand laid in fiberglass with a smooth gel-coat surface, ready to go straight to your upholstery shop or paint booth. The full-coverage design wraps the entire factory door panel area, which eliminates the lower-door gaps and rough edges common on cut or modified shells.

The layout is optimized for power windows, with switch and lock locations designed to move to the center console. Door mounting is possible with customer modification. Both front and rear doors accept 6.5-inch speakers without cutting door metal, and Fesler offers a no-cut speaker kit using Morel components, including an optional 3-way configuration, sold separately.

SPECS AT A GLANCE

- **Fitment.** 1988-2000 Chevy/GMC OBS crew cab trucks and Suburbans
- **Included.** Four panels: front left, front right, rear left, rear right
- **Material.** Hand-laid fiberglass
- **Finish.** Smooth gel-coat, ready for upholstery or paint
- **Speaker cutouts.** 6.5-inch, front and rear doors
- **Window configuration.** Designed for power windows (components not included)
- **Dash clearance note.** 1996 and newer stock dash may contact the front panel edge; shaving the panel edge provides clearance
- **Lead time.** 1 to 3 business days when in stock
- **Made in.** Phoenix, Arizona

WHY WE BUILT THEM

OBS crew cabs have been a popular build platform for years, but full four-door interior solutions for these trucks have been short supply. Fesler designed these panels to pair with the forthcoming Fesler OBS dash and billet interior door handle and armrest kits, giving builders a complete interior system built to consistent in-house standards rather than pieced together from multiple suppliers.

“These trucks deserve a real interior solution, not a patchwork of parts that almost fit.”

Chris Fesler
